Project Name	AI BlogNest API
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	Yes	Visible app.js and server.js use consistent indentation.
2	Proper File Structure	Files and folders are logically organized	Partial	MVC structure is stated in README; only app.js and server.js were supplied for inspection.
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Examples: authRoutes, blogRoutes, aiRoutes, connectDB, PORT.
4	Function / Method Names	Functions are descriptively named	Partial	Startup callback and imported module names are clear; route/controller functions were not supplied.
5	Code Comments	Inline and block comments explain logic	Partial	README documents setup and endpoints; limited comments visible in supplied JS files.
6	Modular Design	Code is split into reusable functions/modules	Yes	Routes, DB connection and error middleware are imported as separate modules.
7	No Redundant Code	Duplicate or unused code is removed	Not verifiable	Full source tree was not supplied for duplication review.
8	Error Handling	Exceptions and errors are handled gracefully	Partial	Central error middleware is mounted; its implementation was not supplied.

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technolog	yWhere Reused	Reusability Level (High / Medium / Low)
1	Express application setup (app.js)	JavaScript / Express	Central app setup; mounted by server.js	High

2	Server startup (server.js)	JavaScript / Node.js	Starts the API and calls database connection	Medium
3	Authentication routes	JavaScript / Express	Mounted under /api/auth	Medium
4	Blog routes	JavaScript / Express	Mounted under /api/blogs	Medium
5	AI routes & error middleware	JavaScript / Express	Mounted under /api/ai; shared error handling	Medium

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	4	Clear app/server separation and route modules referenced.
Readability	4	Descriptive names and consistent formatting in supplied JS files.
Reusability	3	Routes and middleware are separated; detailed module code unavailable.
Documentation / Comments	4	README provides setup, environment variables and endpoint documentation.
Overall Score	4	Indicative assessment of supplied files only; full repository review is pending.
