

No. of Functional Features Included in the Solution

Date	01 October 2026
Team ID	6ab4c24ba238dc999eb5437a
Project Name	AI BlogNest API
Maximum Marks	5 Marks

Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	User Registration	Registers a user with name, email and password.	Auth routes	Done*	Core
2	User Login	Authenticates a user and provides access token.	Auth routes / JWT	Done*	Core
3	Profile Retrieval	Returns the logged-in user's profile.	Auth routes	Done*	Core
4	Create Blog	Creates a blog post with title, content and category.	Blog routes	Done*	Core
5	Read Blogs	Lists all blogs and retrieves a blog by ID.	Blog routes	Done*	Core
6	Update Blog	Updates an existing blog post by ID.	Blog routes	Done*	Core
7	Delete Blog	Deletes a blog post by ID.	Blog routes	Done*	Core
8	AI Generate & Summarize	Generates blog content and summarizes supplied content using Gemini.	AI routes / Gemini	Done*	Additional

Feature Summary:

Metric	Count / Value
--------	---------------

Total Features Planned	8
Total Features Implemented	8*
Core / Must-Have Features	7

Additional / Nice-to-Have Features	1
Features Tested & Verified	Not independently tested; API collection supplied

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	0	No frontend UI is included in the supplied files; this is an API backend.
2	Backend / Logic	3	Express app, server startup and route modules (auth, blogs, AI).
3	Database / Storage	1	MongoDB connection using Mongoose; database models are referenced by project architecture.
4	API / Integration	3	REST endpoints; Gemini AI integration; Postman/Thunder Client collection.
5	Security / Authentication	2	JWT-protected routes and bcryptjs password hashing are identified in project description.

*Feature status follows the supplied README and API collection; route/controller/model source files were not among the uploaded files, so internal implementation was not independently inspected.
